"Since completing the Implementation we have seen that the system has provided us with good functionality and excellent value and would recommend Kypera to anyone looking for an accounting system. The Kypera Consultants were very committed, competent, approachable and the project management was very professional."

Michael Hall, Head of Finance Developments at ST. James Place

Easy Navigation in a multiple windows environment

Core Modules

- Nominal & Cash Book
- Purchase Ledger
- Sales Ledger
- Budgeting & Forecasting
- Inventory
- Fixed Assets
- Project Accounting
- CRM
- Credit Control
- Corporate Logic

An easy to use Unified Ledger

The unified ledger structure provides time saving automated ledger reconciliation. This gives you the ability to drill down and across the ledgers in a dynamic manner and means information can be filtered and extracted quickly and simply.

Flexible Coding Structure

The flexible coding structure facilitates easy data access for enquiries and reporting. The additional analysis codes and sort codes provide further capabilities to sub divide and group the chart of accounts to accommodate multi-level reporting throughout the system.

Integrated Business Solutions

Combine Kypera Business Solutions for Purchasing, Sales, Expense and Project Management to achieve a fully integrated Financial and Business management Solution. Kypera Business combines all major business processes into a single web based easy to use solution specifically designed to operate alongside Kypera Financials.

Multi-Company & Multi-Currency Compliant

The SQL database structure means the system is fully scalable and can accommodate multiple companies and entities, whilst easily managing intercompany postings and reconciliation. The software is fully multi-currency compliant and can utilise dual based currencies for reporting purposes; an essential requirement for international businesses.

Powerful Excel based Financial Reporting

Kypera XLR is the powerful reporting tool embedded in Kypera Financials. It provides a powerful reporting tool that draws real-time information from the finance database, into the familiar surroundings of Excel. It allows users to create high level management reports and forecasts whilst providing full drill down and drill around capabilities to further interrogate the data, right down to individual transactions.

Solution Features:

- Flexible Coding Structure
- User Reconciliation Facilities
- Electronic Payments Functionality
- Direct Debit Capabilities
- Email Remittances
- Scanning Interface
- Invoice Approval
- Extensive Import / Export Capabilities
- Muti-Company & Multi-Currency Compliant
- Redefinition of Account Codes
- Transaction Editing & Cloning
- Scheduled / Recurring Transactions
- Dynamic Enquiries & Multi-Level Reporting
- Automated Bank Reconciliation

“Previously, everything was done on a month to month basis. To get anything done, you had to close down all your ledgers, so staff had to rush to complete transactions before moving onto the next month, which was a nightmare. With Kypera's open ledger system, everything runs so much smoother, as staff can work on the various ledgers simultaneously.”

Amanda Irwin – Financials Officer – New Gorbals Housing Association
